Leaders in enteral delivery

Enteral Syringes 4-6

- ENFit Single Use Syringes
- ENFit Reusable Syringes
- Oral Tip Low Dose Syringes (ENFit compatible)
- Oral Tip Syringes
- Reusable Oral Tip Syringes

Syringe Accessories 7-10

- ENFit Bottle Adapters
- ENFit Syringe Caps
- ENFit Straws
- ENFit Blunt Drawing Up Needles
- ENFit Spike Adapter
- ENFit Colostrum Collector
- ENFit Syringe Bolus Filter

Nasogastric & Nasojejunal feeding tubes 11-15

- ENFit Polyurethane Nasogastric Feeding Tubes
- ENFit Polyurethane Nasogastric Feeding Tubes with Guidewire
- ENFit Polyurethane Y-Port Nasogastric Feeding Tubes with Guidewire
- ENFit Polyurethane Nasojejunal Feeding Tubes with Guidewire
- ENFit Feeding/ Aspiration Tubes

Medicina Specialist Tubes 16-17

- ENFit Double Lumen Feeding / Aspiration Tubes
- ENFit Double Lumen Salem Tubes

Medicina Gastrostomy Devices 18-21

- Gastrostomy Tubes
- Gastrostomy Buttons
- ENSwivel Gastrostomy Button Extension Sets
- StomaMeter

ENFit Feeding Tube Accessories 22-31

- DoubleCHEK
- FastLock Bridle
- ENFit Drainage Bags
- ENFit Decompression System
- ENFit Gravity Sets
- ENFit Extension Sets
- Gastrostomy Bolus Extension Set
- ENFit 4 Way Stopcock
- pH Strips
- Nasogastric Nose Plaster
- Gastrostomy Tidy
- Ace Stopper
- ACElok Dressing
- Transitional Adapters

Printed on 100% recycled carbon-balanced paper.
Certificate number CBP017732

WORLD LAND TRUST™

Medicina has been supplying and innovating medical products for over 25 years.

We specialise in enteral feeding consumables including syringes, feeding tubes and accessories.

Medicina introduced the first safe enteral feeding system in 2005, the Reverse Luer system. In 2009 this system became the UK standard connector. The Reverse Luer system significantly improved patient safety and reduced the risk of accidental misconnections with other non-enteral patient access lines.

After seeing the systems advantages and safety improvements, the Reverse Luer system was adopted by additional countries until the global international design standard (ISO) connector was introduced.

Medicina successfully launched the ISO standard connector 'ENFit' (ISO80369-3) in 2015. The introduction of this standard marked a milestone in the global effort to improve patient safety. ENFit was designed to replace all other enteral connector systems used throughout the world to ensure one global solution. The ENFit standard establishes the requirements for enteral small-bore connectors making it difficult, if not impossible, for unrelated delivery systems to be connected. The ENFit system provides a "hospital-wide" solution for safer enteral access because all components are compatible throughout the hospital. Medicina also offers a compatible and complimentary home feeding system ensuring a smooth transition from hospital to home.

Medicina was proud to become a part of the HMC group in 2017. HMC manufactures Medicina and own-brand medical devices in its state-of-the-art manufacturing facilities in Mirandola, Italy. Our shared vision is to provide practical, safe and reliable products to meet both clinician and patient needs. The combination of HMC's manufacturing expertise and Medicina's history of innovation within the enteral sphere, provides a great platform to provide leading enteral feeding devices, resulting in superior healthcare throughout the world.

Leaders in enteral delivery

Enteral Syringes

The ENFit ISO Standard range of enteral syringes has been developed to deliver enteral feeds, medicines and flushes safely to neonatal, paediatric and adult patients.

This safety system provides a 'hospital wide' solution for safer enteral access because all the components are compatible with all other enteral feeding systems used within the hospital. A compatible home feeding system is also provided, ensuring a smooth transition from hospital to home. Oral tip syringes are also available to allow administration of feed/medications orally.

ENFit Single Use Syringes

Features

- **Sterile**
- **Individually Packaged**
- **Purple**
- **ENFit compliant**
- **Clear measurement markings**
- **Low dose tip design to improve dose accuracy (1ml and 2.5ml)**
- **Three piece syringe (barrel, plunger and gasket)**
- **DEHP/Latex free**

Medicina code	Product Description	Box Qty
LPE01LD	1ml ENFit Low Dose Syringe	100
LPE25LD	2.5ml ENFit Low Dose Syringe	100
LPE05	5ml ENFit Syringe	100
LPE10	10ml ENFit Syringe	100

LPE30	30ml ENFit Syringe	80
LPE60	60ml ENFit Syringe	60
LPE100	100ml ENFit Syringe	30

ENFit Reusable Syringes

Features

- **Reusable/Washable**
- **Individually packaged**
- **Purple**
- **ENFit compliant**
- **Clear measurement markings**
- **Low dose tip design to improve dose accuracy (1ml and 2.5ml)**
- **Three piece syringe (barrel, plunger and gasket)**
- **O-ring gasket to prevent swelling when cleaning**
- **DEHP/Latex Free**

Oral Tip Low Dose Syringes (ENFit compatible)

The oral tip low dose syringe has been designed to give feed and medication orally, as well as being compatible with ENFit devices.

Features

- **Sterile**
- **Individually packaged**
- **Purple**
- **ENFit compatible**
- **Clear measurement markings**
- **Low dose tip design to improve dose accuracy**
- **Three piece syringe (barrel, plunger and gasket)**
- **Smooth oral tip connector**
- **DEHP/Latex Free**

Syringe Accessories

Medicina has put together a large range of accessories to help with the delivery of feeds and medicines using the ENFit syringe feeding system.

ENFit Bottle Adapters

When drawing-up with an ENFit syringe, an ENFit Bottle Adapter allows for more accuracy as per ISO 80369-3 recommendation.

They are designed to fit tightly in the neck of the bottle allowing the tamperproof cap to be screwed on securely (excluding BA01L). ENFit Bottle Adapters will last the life of the bottle and they should be discarded together.

Features

- **Sterile**
- **Individually packaged (Excluding BAxxBL range)**
- **Purple**
- **ENFit compliant**
- **Available in various sizes to fit a range of bottles**
- **Stepped bottle adapter fits multiple bottles**
- **Minimises medicine waste**
- **Improves dose accuracy**
- **Tamper proof cap can still be utilised (excluding BA01L)**
- **DEHP/Latex Free**

Medicina code	Product Description	Box Qty

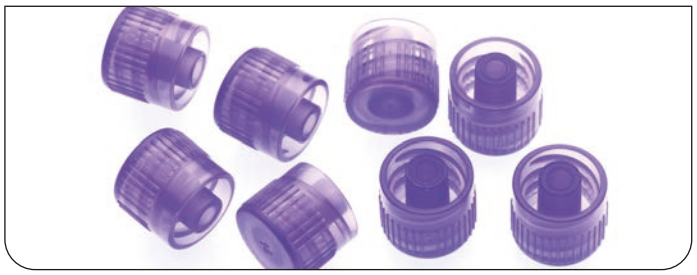
ENFit & Oral Tip Syringe Caps

ENFit/Oral Tip Syringe Caps allow feeds/medications to be prepared in advance.

ENFit/Oral Tip Syringes can be capped off until required. The syringe caps come packaged singularly or in packs of 8 to allow multiple feeds/medications to be prepared.

Features

- **Sterile**
- **Available singular or in packs of eight**
- **Purple**
- **ENFit compliant**
- **Oral Tip compliant (OTC range)**
- **Prevent syringes from leaking**
- **Connects with ENFit and ENFit low dose syringes**
- **Allows end users to prepare feeds/medications in advance**
- **DEHP/Latex Free**



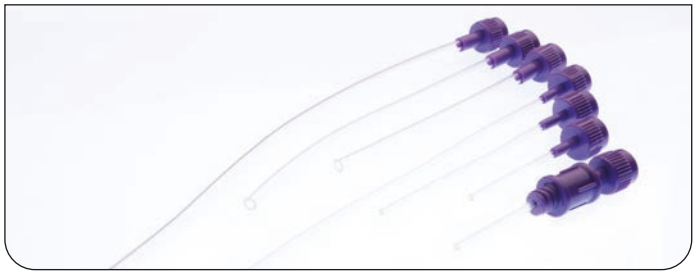
Medicina code	Product Description	Box Qty
M158/1LD	ENFit Syringe Cap (Single)	50
M158/8LD	ENFit Syringe Caps (50 packs of 8)	400
OTC01	Oral Tip Syringe Caps (Single)	50
OTC08	Oral Tip Syringe Caps (50 packs of 8)	400

ENFit Straws

The Medicina ENFit Straws are available in various lengths and bore sizes, allowing you to draw up a wide range of different fluids.

Features

- **Sterile**
- **Individually packaged**
- **Purple connector**
- **ENFit compliant**
- **Various lengths/bore sizes**
- **Minimises medicine waste**
- **Improves dose accuracy**
- **Filter straw is available for glass ampoules**
- **Longer straws prevent end users having to invert larger bottles**
- **Rectal straws for easy administration of rectal medications**
- **DEHP/Latex Free**



Medicina code	Product Description	Box Qty
C005L	ENFit 5cm Medicine Straw	50

RC150L	ENFit 15cm Rectal Straw	50

ENFit Blunt Drawing Up Needles

When drawing up into an ENFit syringe from a vial with a rubber bung or a glass ampoule, you may need to use an ENFit Blunt fill needle or an ENFit Blunt fill filter needle.

The blunt needles are cut to a 45 degree angle, meaning they take 10 times the amount of force required to pierce human skin than a standard hypodermic needle. This allows you to access multi dose vials/ampoules whilst reducing the risk of needle stick injury.

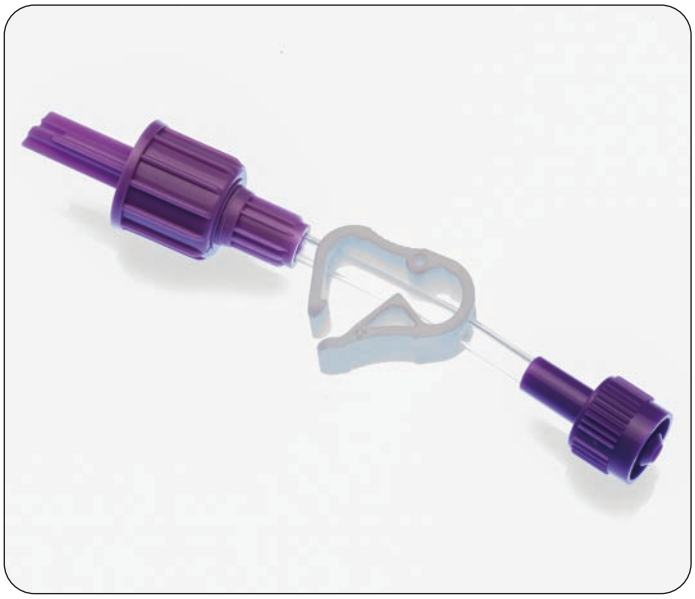
Features

- **Sterile**
- **Individually packaged**
- **Purple connector**
- **ENFit compliant**
- **Reduces the risk of needle stick injury**
- **Complies with European Directive 2010/32/EU on sharps**
- **Reduces medicine waste**
- **Improves dose accuracy**
- **Sharp enough to access a rubber bung without coring**
- **5 micron filter (MN02L)**
- **DEHP/Latex Free**

Medicina code	Product Description	Box Qty
MN01L	ENFit Blunt Fill Needle	50
MN02L	ENFit Blunt Fill Filter Needle	50

ENFit Spike Adapter

The ENFit Spike Adapter allows multiple ENFit syringe access to feed bags.



Features

- **Sterile**
- **Individually packaged**
- **Purple connectors**
- **ENFit compliant**
- **ENPlus connection**
- **DEHP/Latex Free**

Medicina code	Product Description	Box Qty
SA01L	ENFit Spike Adapter	50

ENFit Colostrum Collector

When the ENFit standard was introduced, especially with the low dose amendment, it became almost impossible to express colostrum into smaller syringes due to the spike in the low dose connector.

When you use the colostrum collector in conjunction with OTLD syringes (page 5) you have the ideal solution.

Features

- **Sterile**
- **Individually packaged**
- **Purple connector**
- **ENFit compliant**
- **Easy to collect colostrum**
- **Comfortable for patient**
- **DEHP/Latex Free**

Medicina code	Product Description	Box Qty
TA10	ENFit Colostrum Collection Device	50

ENFit Syringe Bolus Filter Cap

The Bolus filter cap protects feed from contamination. It can be used in conjunction with 20ml and 60ml ENFit syringes.

Features

- **Sterile**
- **Individually packaged**
- **Purple**
- **ENFit compliant**
- **Protects feed from contamination**
- **DEHP/Latex free**

Medicina code	Product Description	Box Qty
BA10L	ENFit Syringe Bolus Filter	50

Nasogastric & Nasojejunal feeding tubes

Medicina has a comprehensive range of nasogastric and nasojejunal tubes to feed a wide variety of patients from neonates to adults both in hospital and at home.

Fully NPSA compliant

In March 2011 the NPSA UK issued a Patient Safety Alert which updated the NPSA Alert from March 2005. These alerts are very clear in the physical characteristics needed for a tube that is going to be used for feeding, flushing or for delivering medication. All Medicina nasogastric and nasojejunal tubes are fully compliant with both alerts.

Medicina Specialist Tubes

ENFit Double Lumen Feeding/Aspiration Tubes

The ENFit double lumen nasojejunal feeding and gastric aspiration tube is used to feed into the small bowel and simultaneously aspirate the stomach. There are two versions of the tube depending on the method of placement.

The EF2L has an internal guidewire for surgical or endoscopic placement.

The EF2EL has an external guidewire and an open tip for an “Over the Wire” placement technique either radiologically or by using the guidewire down the centre of the endoscope.

The aspiration lumen of these tubes may be used to feed the patient as they recover. Care must be taken changing the labels on the tubes.

Medicina Gastrostomy devices

A gastrostomy device provides direct access into the stomach, allowing nutritional support, whilst bypassing the mouth and throat.

A gastrostomy device is often necessary when a patient requires long-term nutritional support. Gastrostomies can be created surgically or using a percutaneous technique. Initial kits are used to create the tract and fit the first feeding device. When the tract has become established, replacement devices can be used.

Gastrostomy Tubes

A gastrostomy tube is a feeding tube which allows direct access to the stomach after the initial tract has been established.

They are secured using an internal balloon and an external skin disc, allowing them to be fitted on an outpatient basis or in the community.

Features

- **Sterile**
- **Innovative rotating connector - ENSwivel (ENFit compliant)**
- **High-quality medical grade silicone**
- **90° fixation plate for secure fixation and improved air circulation at the stoma site**
- **Distance markings of 2cm**
- **Imprint of the balloon volume on the shaft**
- **Inflation port for balloon filling. This is colour coded to signify FR size**
- **Convenient accessories with every tube. A pack of lubricant for ease of insertion and a 10ml syringe to inflate the retention balloon**
- **Flat rounded tip allows for atraumatic insertion**
- **Recessed tip to prevent trauma once the balloon is inflated**
- **High balloon stability of the inner retention balloon for long usage and secure fixation**
- **Available in single port and Y port**
- **Radiopaque stripe along the shaft**
- **DEHP/Latex Free**

Gastrostomy Buttons

Gastrostomy buttons offer practical and cosmetic advantages for the patient.

We offer a range of sizes for adults and children to cater for the individual and provide a perfect fit. Due to its low profile and small size, the button allows patients to continue with their daily activities with as little intrusion as possible.

Features

- **Sterile**
- **High-quality medical grade silicone**
- **Small and low profile**
- **The underside is moulded to fit the tract and there are no edges to catch on clothing**
- **Built in anti-reflux valve to prevent leakage**
- **Imprint of the balloon volume on the shaft**
- **Inflation valve for balloon filling**
- **Flat rounded tip allows for atraumatic insertion**
- **Recessed tip to prevent trauma once the balloon is inflated**
- **High balloon stability of the inner retention balloon for long usage and secure fixation**
- **Apple shaped retention balloon provides a good seal and reduces leakage from the tract**
- **Radiopaque stripe along the shaft**
- **DEHP/Latex Free**

ENSwivel Gastrostomy Button Extension Sets

**The Medicina range of extension sets are made of kink resistant, biocompatible polyurethane.
They are equipped with ENFit connectors according to ISO80369-3 and Danumed's innovative rotating connector, the ENSwivel.**

ENSwivel allows easy connection and disconnection. Even very tight connections can be easily and comfortably released. Only the rotating swivel is turned. This avoids twisting of extension sets and feeding tubes, resulting in superior patient comfort and more convenient user handling.

Features

- **Available in sterile and non-sterile**
- **ENFit connectors**
- **Biocompatible Polyurethane**
- **Kink resistant**
- **Innovative rotating connector ENSwivel**
- **High-quality Tritan connectors. Tritan is very resistant to aggressive solutions and medicines. It is also extremely break resistant in application**
- **Comprehensive portfolio**
- **Up to 14 day use**
- **DEHP/Latex Free**

StomaMeter

Stoma Measuring Device with retention balloon.

The StomaMeter is a measuring instrument for determining the stoma length. The length of the stoma tract is measured simply, accurately and reliably to ensure the perfect selection of a gastrostomy button.

Features

- **Sterile**
- **High-quality medical grade silicone**
- **Non slip retention plate simplifies reading of measurement markings**
- **Imprint of the balloon volume on the funnel**
- **Convenient accessories with every StomaMeter A pack of lubricant for ease of insertion and a 10ml syringe to inflate the retention balloon**
- **Flat rounded tip to avoid trauma**
- **Radiopaque stripe along the shaft**
- **Easily readable and wipe resistant distance markings**
- **Available in size 12FR. Suitable for each stoma**
- **DEHP/Latex Free**

Medicina code	Product Description	Box Qty

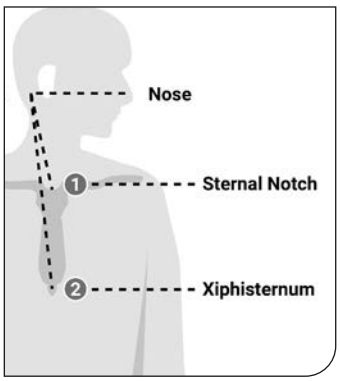
ENFit Feeding Tube Accessories

DoubleCHEK

Combining CO2 & pH indicator checks into one single, simple-to-use device allows clinicians to place any size nasogastric tube, from any manufacturer, safely & quickly.



Features

- **Easy-to-read pH & CO2 indicators assist with tube placement**
- **Compatible with any size of tube**
- **Made for all ages/sizes of patients**
- **Use with existing equipment & supplies**
- **ENFit™ compatible connectors**
- **Single patient use (24 hours)**
- **Reduce the incidence of lung misplacements**
- **Initiate enteral feeding earlier**
- **Reduce unnecessary exposure to radiation**
- **Reduce patient transport related complications**
- **Reduce length of stay in the ICU**

Medicina code	Product Description	Box Qty
DC-1001	DoubleCHEK	10

FastLock Bridle

The FastLock Bridle is an innovative solution for securing a nasogastric feeding tube.

The FastLock Bridle allows health care professionals to be more confident that a feeding tube will not become dislodged. As a result, the patient will receive the necessary care.

Medicina code	Product Description	Box Qty
NBK6	6FR Fast Lock Bridle	5
NBK8	8FR Fast Lock Bridle	5
NBK10	10FR Fast Lock Bridle	5
NBK12	12FR Fast Lock Bridle	5
NBK14	14FR Fast Lock Bridle	5

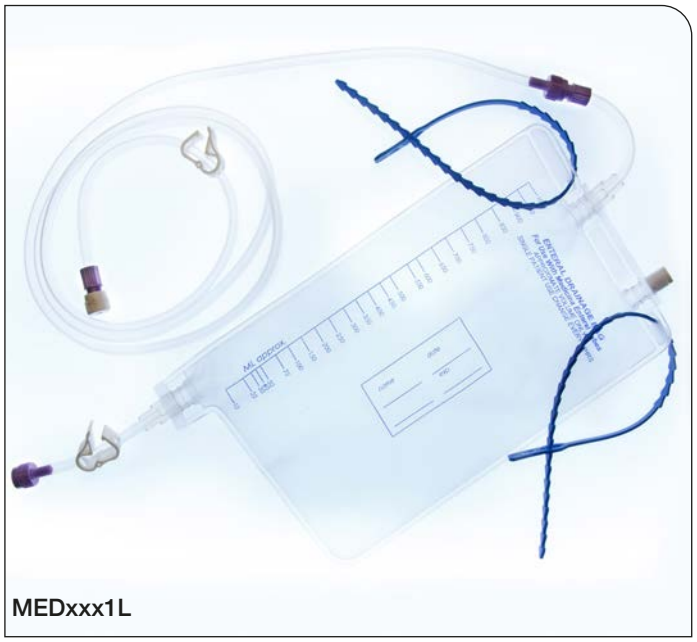
Features

- **Easy to operate and faster placement**
- **Introducer shaft & bend switch allows easier placement around the septum**
- **Bridle lock secures nasogastric tube and bridle tape in separate sections**
- **Easy to reposition tube or tape if necessary**
- **Compatible with all nasogastric tubes**

ENFit Drainage Bags

Enteral drainage bags connect directly to feeding tubes or to ENFit extension sets (connected to feeding devices) to allow collection of drained fluids.

MEDxxxL



MEDxxx1L

Features

- **Sterile**
- **Individually packaged**
- **Purple connector**
- **ENFit connector**
- **Extract samples of gastric fluid for analysis**
- **Clamp to prevent leaking**
- **Antibacterial filter allows gas to escape so the bag collects 100% stomach contents**
- **Three drainage bag options:**
  - **Standard Drainage Bag**
  - **Drainage Bag including extension tubing and bag strap**
  - **Drainage Bag including wide bore cone adapter extension tubing & bag strap (compatible with RT range – page 15)**
- **DEHP/Latex free**

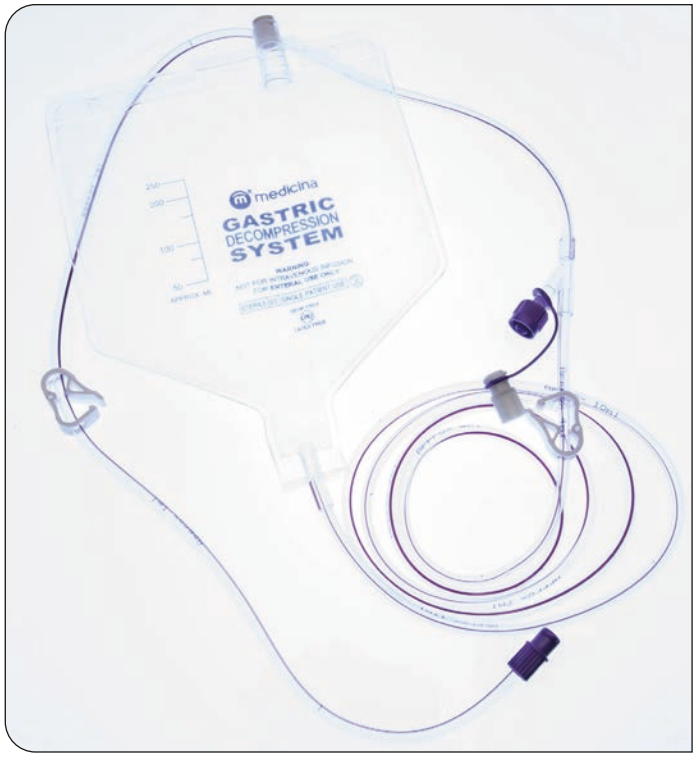
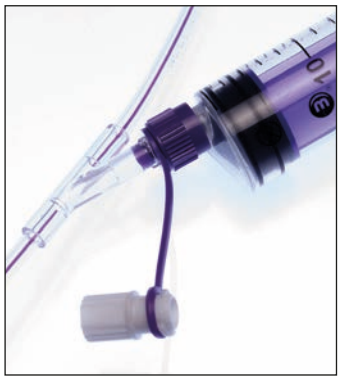
ENFit Decompression System

The ENFit Gastric Decompression System removes gas from a patient's stomach, eliminating the pain and discomfort associated with fluid and gas retention.

Patients can digest enteral formula at their own rate and reach their calorific goals.





Features

- **Sterile**
- **Individually packaged**
- **Purple connector**
- **ENFit connector**
- **Relieves gastric distention (bloating of the stomach)**
- **Eliminates the pain and discomfort associated with fluid and gas retention**
- **Allows patients to digest enteral formula at their own rate and reach there enteral calorific goals**
- **Available in two sizes (Children & Adults)**
- **DEHP/Latex free**

Medicina code	Product Description	Box Qty
EV01L	250ml ENFit Gastric Decompression System	30
EV02L	500ml ENFit Gastric Decompression System	30

ENFit Gravity Sets

Medicina have a range of ENFit Gravity Feed Sets including a Universal Bottle Adapter or ENFit Cross Spike.

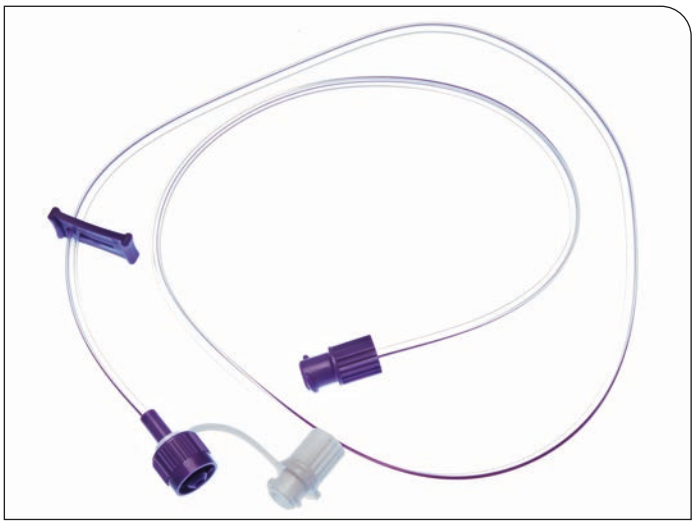
Features

- **Sterile**
- **Individually packaged**
- **Purple connectors**
- **ENFit connector**
- **Available with Universal Bottle Adapter or ENFit Cross Spike**
- **Connects to ENFit feeding tubes**
- **Drip Chamber**
- **ENFit Y Site**
- **Roller Clamp**
- **The MGS12L and MGS13L include a detachable Funnel Adapter. The detachable Funnel Adapter can become a part of a gastrostomy feeding device making it ENFit compatible**
- **DEHP/Latex free**

Medicina code	Product Description	Box Qty
MGS10L	ENFit Gravity Set with Universal Bottle Adapter	30
MGS11L	ENFit Gravity Set with ENFit Cross Spike	30
MGS12L	ENFit Gravity Set with Universal Bottle Adapter & Detachable Funnel Adapter	30
MGS13L	ENFit Gravity Set with ENFit Cross Spike & Detachable Funnel Adapter	30

ENFit Extension Sets

Several long and short ENFit extension sets are available (with and without Y-Sites) to connect an ENFit device/pump to a feeding tube.



Medicina code	Product Description	Box Qty
EP015L	15cm Long Extension Set ENFit	50
EP015LYW	15cm Long Y Site Extension Set ENFit Wide Bore	50
EP075L	75cm Long Extension Set ENFit	50
EP075LY	75cm Long Y Site Extension Set ENFit	50
EP075LW	75cm Long Extension Set ENFit Wide Bore	50
EP075LYW	75cm Long Y Site Extension Set ENFit Wide Bore	50
EP150L	150cm Long Extension Set ENFit	50
EP150LY	150cm Long Y Site Extension Set ENFit	50

Features

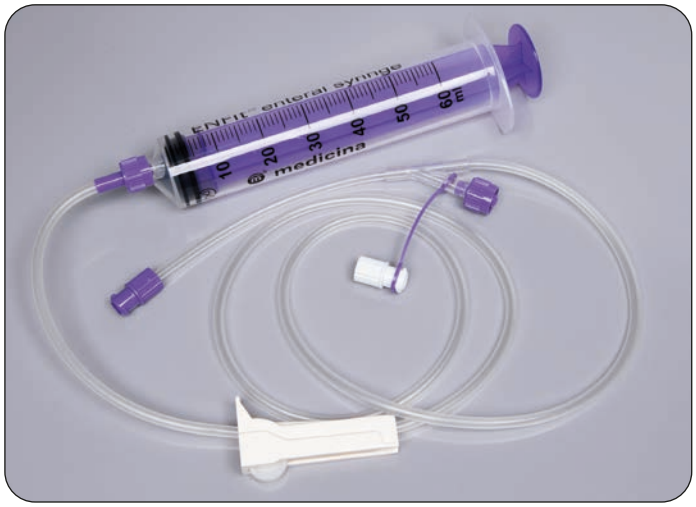
- **Sterile**
- **Individually packaged**
- **Purple connectors**
- **ENFit connectors**
- **Extension sets provide longer length tubing to connect to a feeding tube**
- **Wide bore extension sets are available for high density feeds**
- **Y-site option for administration of medication**
- **DEHP/ Latex Free**

Gastrostomy Bolus Extension Set

The Gastrostomy Bolus Extension Set aids the process of feeding down a gastrostomy tube. It is used when the rate of delivery needs to be controlled.

Features

- **Sterile**
- **Individually packaged**
- **Purple connectors**
- **ENFit connectors**
- **Roller clamp to control speed of delivery**
- **Y-site for administration of medication**
- **60ml ENFit syringe included**
- **DEHP/ Latex free**



Medicina code	Product Description	Box Qty
MGS02L	Bolus or Gravity Gastrostomy Extension Set	30

ENFit 4 Way Stopcock

The ENFit 4-way stopcock has a female connector and two male connectors.

The device is used to provide an alternative route to administer enteral medication down a feeding tube. It can also be used to mix enteral medication and saline solution, in line with pharmacy advice and manufacturer's instructions.

Features

- **Sterile**
- **Individually packaged**
- **Purple connectors**
- **ENFit connectors**
- **Provides an alternative route to administer medication down a feeding tube**
- **Can be used to mix enteral medication and saline solution**
- **DEHP/ Latex free**

Medicina code	Product Description	Box Qty
SA03L	ENFit 4 - way stopcock (one female port & two male)	50

pH Strips

Under the NPSA guidelines, pH testing is the first line test for tube position.

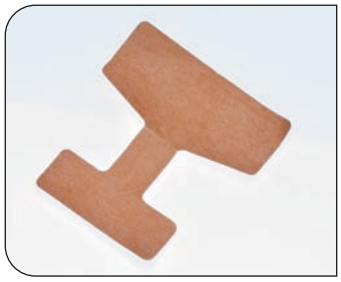
Features

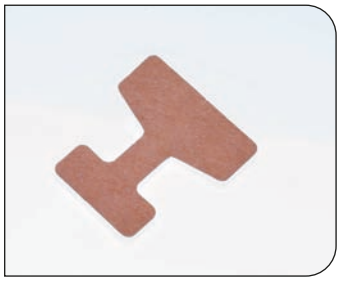
- **CE marked for testing human gastric aspirate**
- **Buffered against water**
- **The Medicina pH Indicator strip acts as its own colour chart, you do not need access to a box/ chart**
- **Available in boxes of 100 or 200**

Medicina code	Product Description	Box Qty
IN01	pH Indicator Strips range 1-12	200
IN02	pH Indicator Strips range 1-12	100

Nasogastric Nose Plaster

The Nasogastric Nose Plaster is a fixation device for Nasogastric and Nasojejunal tubes.





Features

- **Secures NG/ NJ tubes at nose or below the cheek bone**
- **Comfortable for patient**
- **Available in two sizes (Children & Adults)**

Medicina code	Product Description	Box Qty
NP01	Adult Nose Plaster	100
NP02	Paediatric Nose Plaster	100

Gastrostomy Tidy

The gastrostomy tidy is a device designed for patients who are body conscious or who pull on their gastrostomy tubes. The device allows a gastrostomy tube to be kept tidy and secure in a specially made pouch.

Features

- **Soft and comfortable to wear**
- **Discreet when worn underneath clothing**
- **Adjustable waist belt**
- **Machine washable**
- **Available in child and adult sizes**

Medicina code	Product Description	Box Qty
GT01	Medium Gastrostomy Tidy (75cm - 114cm)	1
GT02	Large Gastrostomy Tidy (117cm - 152.5cm)	1

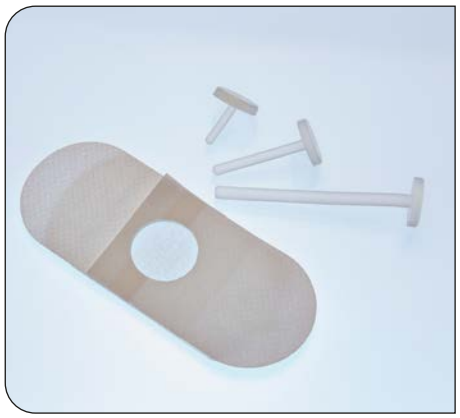
Ace Stopper

Medicina ACE stoppers are small silicone plugs that are used to seal stoma sites at various parts of the body.

Ace stoppers can be used when a gastrostomy device fails or needs replacing. They will seal and maintain the patency of the stoma. A lot of healthcare professionals choose Ace Stoppers as a back-up for all gastrostomy fed patients.

Features

- **Sterile**
- **Individually Packaged**
- **Soft and comfortable**
- **Various lengths and shaft diameters depending on the size of the stoma**
- **Prevents leakage**
- **Seals the Stoma**
- **One ACElok dressing included with each ACE Stopper**
- **Available on prescription (UK)**
- **DEHP /Latex Free**



Medicina code	Product Description	Box Qty
AP8/15	8FR - 15mm long Ace Stopper	1
AP8/30	8FR - 30mm long Ace Stopper	1
AP8/60	8FR - 60mm long Ace Stopper	1

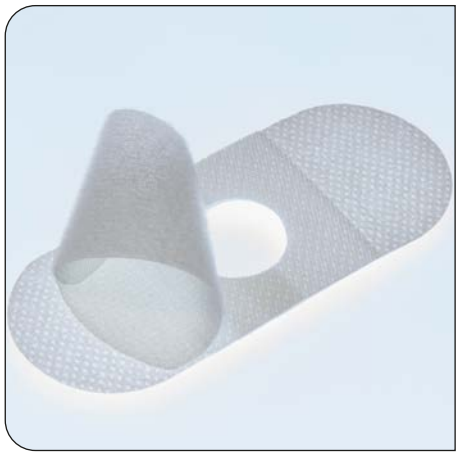
AP12/30	12FR - 30mm long Ace Stopper	1
AP12/60	12FR - 60mm long Ace Stopper	1
AP12/100	12FR - 100mm long Ace Stopper	1
AP14/30	14FR - 30mm long Ace Stopper	1
AP14/60	14FR - 60mm long Ace Stopper	1
AP14/100	14FR - 100mm long Ace Stopper	1

ACElok Dressing

The ACElok dressing has been specifically designed for placement over the ACE stopper to provide external fixation and cushioning.

Features

- **Individually Packaged**
- **Used in combination with ACE Stoppers**
- **Allows easy access to a stoma site without having to remove dressing**
- **Lasts 3-4 days**
- **Available on prescription (UK)**



Medicina code	Product Description	Box Qty
SD03	ACElok Dressing	10

Transitional Adapters

The change to the globally recognised ENFit connector will mean that users will have to run down stock of "old" products before moving to the ENFit system.

All Medicina adapters are designed to be connected to the end of feeding tubes and can be used for up to 30 days.
